11. TOXICOLOGICAL INFORMATION**Information on likely routes of exposure****Product Information**

Product is safe for its intended use based on the formulation, testing results, and the long history of safe consumer use.

Inhalation

Not an expected route of exposure. Inhalation of mist may cause irritation to the respiratory system.

Eye Contact

Not an expected route of exposure. Expected to be severely irritating or corrosive to eyes based on components present in formulation.

Skin Contact

Based on the ingredients present in the formulation, prolonged or repeated skin contact may be irritation, or severely irritating, to the skin. However, testing of tooth whiteners containing 10-22% urea hydrogen peroxide has shown to not cause primary skin irritation to the skin of animals. Irritation may occur to mucous membranes due to the oxidative nature of the hydrogen peroxide present, especially after prolonged or repeated contact.

Ingestion

Not expected to be toxic following ingestion. Ingestion may cause irritation to mucous membranes. Ingestion may cause gastrointestinal irritation, nausea, vomiting and diarrhea.

Symptoms related to the physical, chemical and toxicological characteristics**Symptoms**

Eye contact with liquid may cause irritation including stinging, burning, tearing, or reddening of the eyes.

Delayed and immediate effects and also chronic effects from short and long term exposure**Corrosivity**

Causes serious eye irritation. Risk of serious damage to eyes.

Sensitization

No information available.

Mutagenic Effects Multiple mutagenicity studies of tooth whiteners containing hydrogen peroxide or urea hydrogen peroxide did not show mutagenic effects.
