

Gripper Super Rigid Impression Trays

The super rigid design of The Gripper makes it ideal for all VPS impression applications. For added accuracy, the Sideless Posterior and Posterior trays feature a unique patent-pending polymer resin/metal hybrid design for the ultimate in rigidity and patient comfort.

Each handle grip is made with a matte finish that can be written on for easy patient identification and date recording, helpful not only in the practice but also in the laboratory. The Gripper trays are easy to use and provide exceptional results.

Each tray features a large handle for superior placement, rigid side walls and a soft-lined mesh for exceptional impression accuracy.

Anterior

Posterior

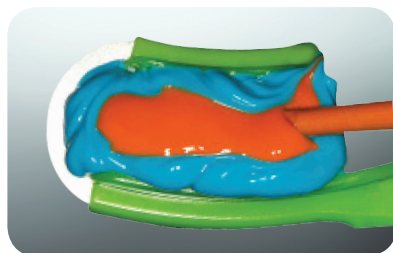

3/4-Arch

Full-Arch

Sideless Posterior

The Gripper's double-bite technique simultaneously captures mandible and maxillary arch impressions and bite registration, providing better accuracy and increased reliability.
