

Flashlite Magna 4.0 LED Dental Curing Light

Higher average power to cure deeper preps

1,300 mW/cm² ± 200 output power for efficient curing, allowing 3.98mm depth of cure in only 10 seconds

Extended battery life with less heat dissipation

The LED engine delivers more light output at a lower battery power, allowing ~700 ten second cures on a single charge with less heat dissipated for patient comfort

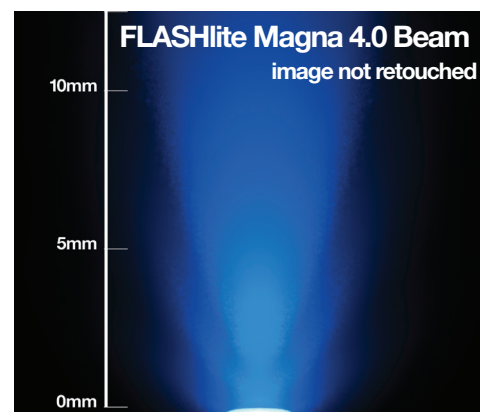

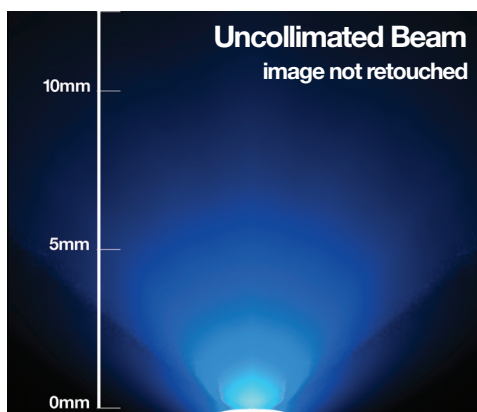

Compact, lightweight, ergonomic design

With a small footprint of only 8" in length and weighing 4.3 oz the Magna fits into any practice with ease

Why is Flashlite Magna's 4.0 collimated beam ideal?

- Cures harder composites
- Increases longevity of restorations
- Increases bond strength faster
- Less sensitivity
- Easily cures posterior restorations
