

precision®
moisture-displacing for highly-detailed impressions

dm
DenMat®

Precision VPS Impression Material

Precision is a premium VPS impression material with amazing detail reproduction, making it the ideal material for the most discriminating clinicians. Its revolutionary formula displaces moisture better than other VPS materials, creating detailed margins in even the most challenging situations.

Precision features a thermally activated flex-set time, which begins to set once inside the mouth and a wild berry scent your patients will love.

- Outstanding dimensional stability
- Thermally activated flexible set times
- Wild berry scent
- Available in five high-contrast colors and four delivery methods

The First Hydrokinetic Impression Material

Precision is an entirely different class of impression materials. Its proprietary hydrokinetic properties aren't just different, they redefine clinical performance in impression materials.

Hydrokinetics: The measure of Performance

Hydrophilicity is good, but moisture displacement is far more important. In fact, it's critical. No matter how hydrophilic traditional VPS impression materials are, they all lose accuracy when exposed to moisture. The revolutionary hydrokinetic formulation of Precision enables it to seek out and displace moisture from the prepared site. As the tissue re-hydrates during impression-taking, Precision continues to flow into sulcular pockets, displacing moisture from both hard and soft tissues and propelling it towards the outer surfaces of the impression. It's not surprising that, in clinical tests*, Precision displaced moisture more effectively than all other materials.

Traditional Impression Material

Traditional VPS material fails to achieve complete moisture displacement

Product	Item #
Precision 2-Pack Cartridges Flex Set Time (2:45 – 3:45)	
Extra Lite Body	SPD1508
Lite Body	SPD1509
Medium Body	SPD1510
Heavy Body	SPD1511
Contents: 2 – 48 ml cartridges, tips, instructions	

Product	Item #
Precision Jumbo Cartridge Refill Kit Flex Set Time (2:45 – 3:45)	
Heavy Body	SPD1547
Contents: 2 – 380 ml jumbo cartridges, tips, instructions	

Product	Item #
Precision Putty Jars Flex Set Time (2:45 – 3:45)	
Putty Jars	SPD1517
Contents: 1 – 250 ml jar base, 1 – 250 ml jar catalyst, mixing spoons, instructions	
Precision Putty Paks Flex Set Time (2:45 – 3:45)	
Putty Paks	SPD1514
Contents: 12 – 18 ml paks, instructions
