

Simplicity Just Ahead

Crown Cementation Simplified!

We know that the crown cementation appointment can sometimes be one of the most difficult on your schedule. To make all of your cementation appointments go as smooth as possible, DenMat has assembled the ideal combination of Hartzell instruments into a single cassette for ease of use and streamlined productivity.

- Instrument combination chosen specifically to streamline all of your cementation appointments
- All instruments housed in one cassette — eliminates lost or misplaced instruments
- Stainless steel cassette allows for easy sterilization-to-operatory convenience
- Eliminates the direct handling of contaminated instruments
- Fabricated using only the highest quality in stainless steel

Add an
aspirating
syringe!
