A.R.T. Preparation Options

Additive Only
Choose this option if the patient and doctor are unwilling to accept any reduction or modification at all. Although the DenMat design team will produce the best possible design, esthetics may be comprised in favor of existing tooth structure retention.

Strategic
Choose this option if the patient and doctor will allow minor modifications or contouring to the existing dentition, only when absolutely necessary on certain teeth. Modifications and or contouring will be kept in enamel only. A reduction template will be created to serve as a roadmap for success.

Idealized
Choose this option if the patient and doctor want optimal esthetics and agree to moderate tooth preparation which may be required in order to achieve ideal results. Generally, interproximal embrasures may be reduced by .3 mm to 5 mm. Facial enamel may be removed to accommodate porcelain without adding bulk, where indicated. Incisal edges are often shortened, unless the case calls for added length. A .3 mm to 5 mm shoulder margin preparation may be required with a .3 mm – 5 mm finish line on the lingual for an incisal wrap. Approximately 1 mm of incisal porcelain is needed for the incisal wrap. Soft, rounded edges are ideal (no sharp or flat edges left on the incisal edges). A reduction template will be created to serve as roadmap for success.

Shipping and Delivery Options

All delivery days are listed in lab working days, starting from date of case acceptance (including acceptable impressions/models, bite registration, and complete prescription information). Working days do not include the date the case is shipped, time in transit, weekends or holidays. Outbound shipments require a standard $15 U.S. flat fee per case.

STANDARD
10 working days for all services. For cases including implants, please phone 1-800-872-8384.
