

# Diode Dynamics: Soft-Tissue Laser Proficiency Course

## Course Description:

During this full-day laser proficiency program, participants will first be exposed to the principles of laser science. Soft-tissue procedures for both general dental and dental hygiene applications will be presented and explained within the context of technique, procedural considerations and patient safety. Participants will then have the opportunity to use multiple varieties of lasers via hands-on application on different mediums, simulating the varying tissue types that are encountered in the clinical setting.

Upon successful completion of the course, attendees will have a better understanding of basic laser science, common soft-tissue surgical laser procedures, and tissue dynamics. They will also be able to adjust laser settings appropriately to optimize safety and efficiency when performing different procedures, while learning when those procedures should and should not be performed.

## Who Should Attend:

- Dentists
- Hygienists
- Dental Assistants

## Topics to be Covered:

- Laser basics
- Surgical fundamentals
- Hygiene dynamics and protocols
- Laser safety

## Learning Objectives:

- Understand basic, intermediate and advanced soft-tissue applications
- Discuss laser physics and tissue interactions
- Describe the role of lasers in treating periodontal pathogens
- Understand what role a laser can play in your practice

**Global Laser Oral Health, LLC**  
Online Accredited Dental Laser Proficiency

## Upcoming Event Dates & Locations

March 31, 2017 - Peoria, AZ  
April 28, 2017 - Garden Grove, CA

# Diode Dynamics: Soft-Tissue Laser Proficiency Course

## Methodology:

- Lecture (6 hours) – PowerPoint, videos and audience engagement
- Hands-on Participation (2 hours) – practical session utilizing multiple diode lasers

## Agenda:

8:00 – 8:30	Introductions; needs; what are you looking for in this course?
8:30 – 9:45	Basic laser science and physics
9:45 – 10:00	Break
10:00 – 11:30	Surgical fundamentals (combination of PPT and video)
11:30 – 12:00	Lunch
12:00 – 1:15	Hands-on applications for basic surgery*
1:15 – 2:00	Hygiene dynamics and protocols
2:00 – 2:15	Laser safety
2:15 – 2:30	Break
2:30 – 3:00	Examination
3:00 – 3:45	Hands-on applications*
3:45 – 5:00	Q&A, CE credits, etc.†

\*Hands-on participation

†Participants will receive a proficiency certificate upon completion of the course.

## Registration:

### Individual Dentist

Registration: \$695‡

### Dentist + Hygienist

Registration: \$1,095  
(from the same office)

### Individual Hygienist

Registration: \$495

‡Team Member Registration: As seating is limited, the first 5 registrants for a course may bring 1 team member free of charge (team members include Dental Assistants, Treatment Coordinators and Office Managers; excludes additional Dentists or Hygienists). Beyond the first 5 registrants, ability to accommodate additional team members is based on capacity and at the sole discretion of GLOH.

**Dr. Robert Levine, DDS**, graduated from NYU School of Dentistry in 1973. He is currently Assistant Professor at Arizona School of Dentistry & Oral Health (2006-present), Director of Laser Dentistry (2006-present) and was previously the Clinical Director of the AEGD program (2009-2013). In 2011, Dr. Levine founded GLOH Education and has since been designing and customizing online laser training programs for students and dental professionals.

Dr. Levine is an internationally recognized lecturer and opinion leader on a variety of disciplines including laser science and adjunctive oral cancer screening technologies, and has authored a wide range of peer-reviewed laser publications. Since 2008, he has worked with Major League Baseball (MLB), and was invited to the 2011 MLB Winter Meetings as a keynote speaker, where he discussed the dangers of using smokeless tobacco products with both Major and Minor League players. He currently consults for the Seattle Mariners, and has pioneered an annual oral cancer screening and education program for the players and staff during Spring Training.
